Product Performance

ON/OFF

ON: Press and hold the power button for 3 seconds with 1 vibration, LED lights on(1-2-3).

OFF: Press and hold the power button for 3 seconds with 1 vibration, LED lights off(3-2-1).

Smoking State

Smoking State:

Preheating: Preheat for 20 seconds with 1 vibration, LED lights flash.

During smoking:

4-3 minutes→the LED remains full light

3-2 minutes→the LED remains 2 lights

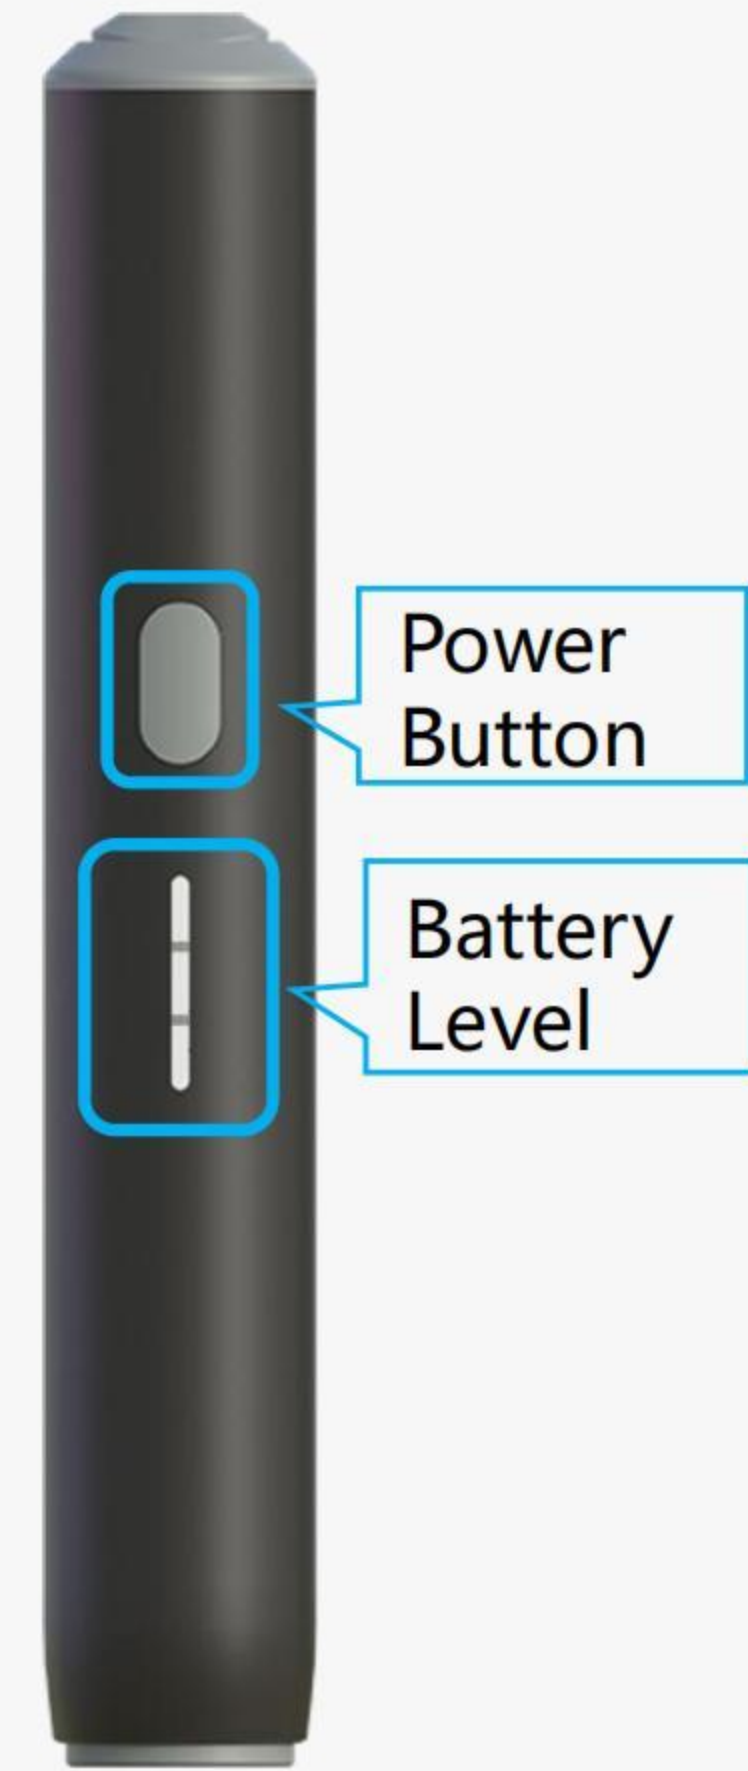

2-1 minute→the LED remains 1 light

60-15 seconds→the LED remains 1 light

and slowly fades out.

15 seconds-0 second→2 vibrations in 15s, 1

vibration to end, the LED remains 1 light and fades out quickly.

Heating

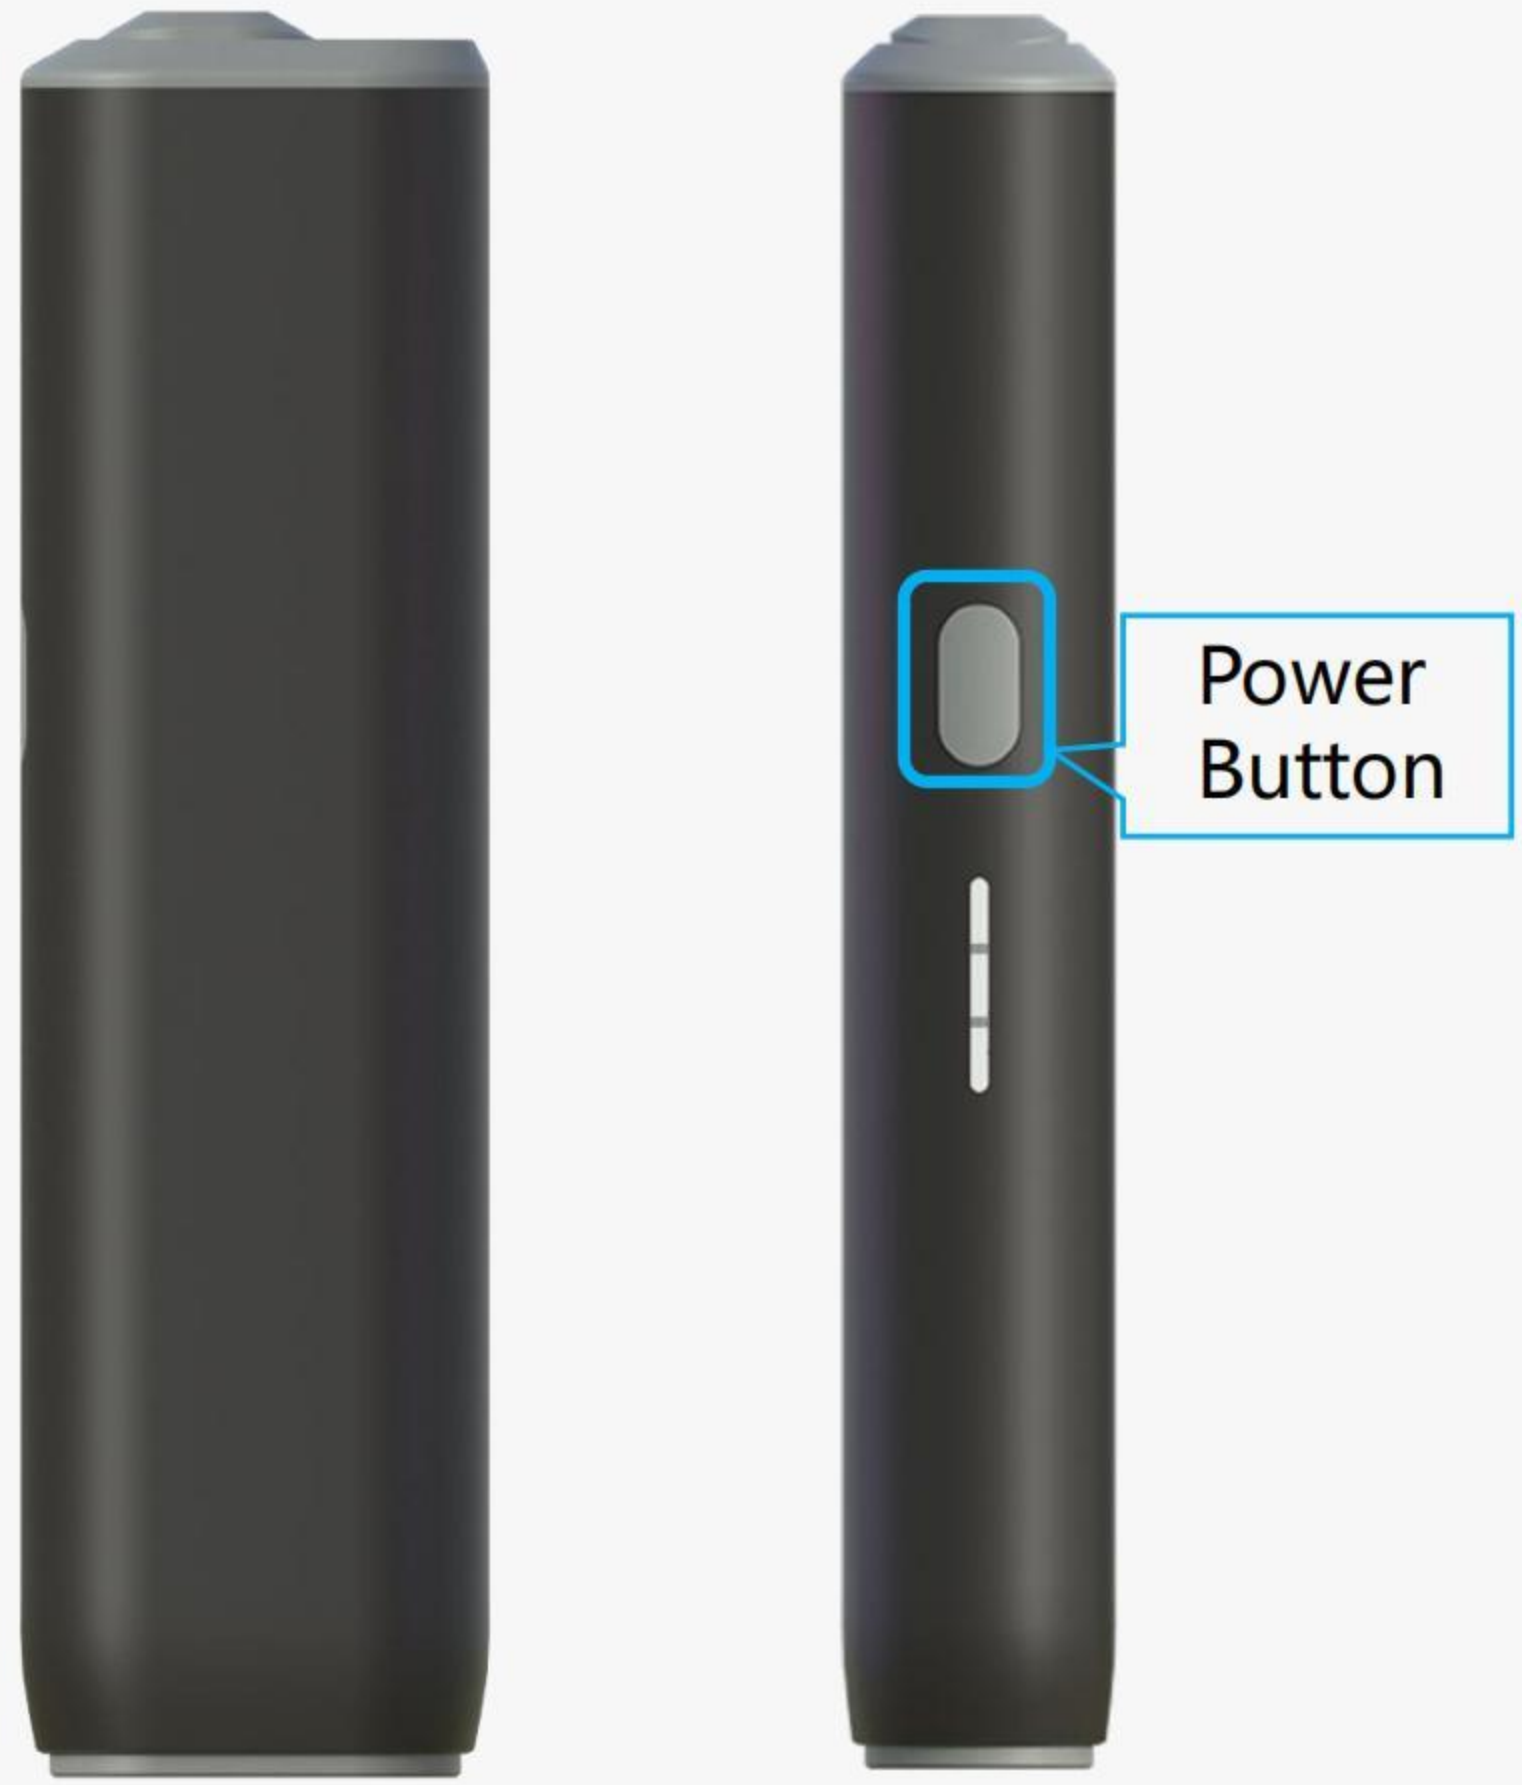

Working

Insert a stick until the device vibrates twice and LED Lights from bottom to top in sequence.

Or, click the power button once and Insert a stick, it will automatically start heating, the device vibrates twice, and LED Lights from bottom to top in sequence.

Stop smoking

Press the power button 5 times continuously to end smoking with 1 vibration, all lights flash 3 times.

Heating Mode Switch

Press the power button twice to switch mode to 250°C
(1 LED light maintains 2 seconds).

Press the power button twice to switch mode to 255°C
(2 LED lights maintain 2 seconds).

Press the power button twice to switch mode to 260°C
(3 LED lights maintain 2 seconds).

Battery Level

Press the power button once to check the battery level.

3 LED LIGHTS → 100%-66%

2 LED LIGHTS → 66%-33%

1 LED LIGHT → 33%-5%

The remaining battery power is less than 5% (smoking will fail to start at this time), and 1 LED light flashes quickly.

Charging

Insert TYPE-C (1 LED light blinks → 1 LED light on and 2 lights blink → 2 lights on, 3 lights blink → full light on).
